A set of simple end-to-end APIs that provide you access to superior flight offers

Amadeus Quick-Connect

When it comes to the many [air] content options available to travel sellers today, these myriads of possibilities are creating one of the most important issues in the travel industry: content fragmentation. With Amadeus Quick-Connect, via a single connection, you'll have all the relevant content you need to inspire travelers with booking options that will convert sales opportunities into bookings.

Search, compare, and book flight deals

Get flight deals from over 500 full-service and low-cost carriers around the world, and information like baggage allowance or departure terminal.

Book the desired flight(s), ancillaries - including seats and/or bags-, process payment and issue the tickets with a single request.

It's easy to use and intuitive. Receive fares in a list or calendar view and filter by price, cabin class, airline or number of stops.

Build unique travel packages

With a single request, you can search and book many different flight options: Multi-destination, complex, one way combinable and standard roundtrips.

You can include your company's fares and blocked space in the search options: Nego fares, Corporate fares or IT fares and Nego space.

Travel sellers with inventory management systems can integrate Quick-Connect to enrich your own packaged offers by accessing diverse flight options.

Make it profitable

Reduce development and implementation costs to a minimum. With Quick-Connect, your API connection will allow your applications and website to be up and running in 4 to 6 weeks.

Features

- Access air content from +500 full service & LCCs
- Enhance your offer with ancillaries
- Access content, functionality and bookability

- Based on Rest/JSON APIs
